Bitter sweetVon Christoph Fischer"A Whisper in the Wind" is a bitter sweet romantic novel set in Georgian England and tells the story of love and friendship challenged by the class system and prejudices at the time.Henry Gampton fathers a child out of wedlock but persuades his wife to raise her as their own. Angelina becomes a real sister to their daughter Sophia.Sixteen years since they took Angelina into their midst Henry dies, leaving the girls to fight for their inheritance against a greedy uncle.Sophia has fallen for the wrong man in the eyes of her family and Angelina as illegitimate child is also seen as without a right to the fortune left behind.The two young women are great characters as you would find them in a good Jane Austin story, vulnerable but strong, the chemistry between Sophia and Robert is very well written and comes alive in front of your eyes. With much insight into the morals and the customs of the times the book is an important reminder on the huge impact class had in England and how destructive its power could be.It is a bitter sweet family story, the love of the father towards his children is heart warming, the greed and

corruption of the uncle quite the opposite. A story well told.

Kurzbeschreibung Following the life of the Gampton family, set on a country estate in Georgian England, the novel opens with the death of a servant who begs Henry Gampton, her master, to take care of her baby daughter, Angelina. Against his wife's wishes, Henry agrees and the child is raised alongside his own daughter, Sophia. Unaware of Angelina's background, the girls become like sisters as they grow up. However, Sophia's life is turned upside down by the death of first her mother and then her father. Inexperienced in matters of the heart, Sophia turns to her father's stable manager for comfort as her world is threatened by the evil intent of her uncle who wishes to ensure that the Gampton estate does not fall into his niece's hands, nor those of the daughter of a mere servant. Unable to trust those around her, Sophia decides to run away with Robert and face a life of poverty, yet full of love, rather than be forced into an arranged marriage. However, her plan is thwarted when her fiancé: Charles Longford, finds Sophia about to depart with Robert in the cold early morning air. Unwilling to see his future disappear, Charles decides to take drastic action in order to stop them.
