Very convincing piece of paranormal romance!Von JohannaAfter having read the blurb, I was intrigued. But after having read the book, I was impressed. This is an overwhelmingly good book. I can't believe that this woman isn't a popular author yet because she definitely should be. I hope this tour can help Charlotte to attract the interest of many more readers. Her book is so worth the effort.Josephine was such a wonderful heroine. I could feel with her from the beginning. I was captivated from the first page to read and read and find out what'll happen to her. She's living in a world where everyong is "cured" from anger because this emotion has caused so much violence and aggression resulting in terror and wars. She has lived such a lonely life because to her like she's the only human being left that's

not a drone. But then she meets Luke. He wants to take care of her and, most importantly, help her with her greatest nightmare: the blood moon. Every year she becomes this horrible monster for one day and has to live with the guilt for the rest of the year. Together with Luke, she tries to find a solution to this problem, find out where the monster came from and how she can be eliminated. I love love love that in this story it was Josi and Luke against the rest of the world. They even felt it themselves, like they were the only two people on Earth. The only people who can really "feel" everything completely. Their chemistry was absolutely spellbinding. I loved every conversation between them. I loved Luke so much, even though he made many mistakes, but the way he dealt with Josi, so careful, deliberate and understanding was just beautiful. The plot was exciting and I really just can't wait to read the sequel. I have to know how the story goes on. There were only a few minor issues I had with the world-building. For example, I didn't fully grasp the concept of wiping out the anger in a person's brain. So many other emotions seem to be erased too, like fear. There are moments when people should be afraid but they can't feel it. But does fear necessarily equal anger? And there was one little fact that kept bugging me. As a musician myself I simply can't believe that someone can play an instrument extremely well and also sings off-key. I mean when someone is musical they can't sing out of tune. They don't automatically have a great voice when it's not trained but I think they can sing. For some reason, that was important to me so there... I said it. Overall, I simply loved this book and I'd like to recommend it to all fans of the YA genre who're even the slightest bit into the dystopian or science fiction or romance genre.

Kurzbeschreibung Perfect for fans of Divergent, this series is about a civilization where negative emotions have been erased, creating a world of mindless drones where only those with fury can survive. Eighteen-year-old Josephine Luquet wakes up naked and covered in blood on the same day every year when the blood moon is full. Josi has not responded to the Curean immunization against anger mandated by the government and believes herself to be a threat to others. Then she meets Luke. Luke has had the Cure but seems different from the other "drones" and he's dead set on helping Josi discover the truth about herself before the next blood moon. But time is running out. Is Luke willing to risk his life to be near her? Does he truly understand what violence she is capable of? Raw and full of passion, Fury is a story of love in a dystopian world, and how much we are willing to forgive in the struggle to remember our humanity.
