KundenrezensionenHilfreichste Kundenrezensionen0 von 0 Kunden fanden die folgende Rezension hilfreich. Great Stories from great SF-authorsVon Dr. Erik MarondeAs a big fan of "the Bears", Robert J. Sawyer and Jack McDevitt I could not let go this collection of stories. To make it short, the whole collection is a great read and I definitely learned that I have to read more books from Ann Leckie. So, especially for those not familiar with some of these authors it gives a good first impression and may (see above) inspire to read more from one or the other of these SF-Masters. Get it and read it!0 von 0 Kunden fanden die folgende Rezension hilfreich. Positive take on technologyVon KundeInteresting (mostly positive) takes on the progresses within technology and how it could change in the future.
