Kurzbeschreibung Dominic Novak left more than a legacy for conservation and an instinctive love for animals behind when he died. He left a son, Anthony, who craved the instinct with animals that his father had and a pupil, Mitchell, whose life changed after hearing Dominic lecture on conservationism at college. Anthony is hiding from the world, scared of people finding the real him and keeping a lid on his grief. Could working together at a placement in Khutzeymateen, a grizzly bear sanctuary in British Columbia, be the making of them, or will it end up destroying Anthony?
